

## Maximizing efficient, high quality COVID-19 screenings

Identifying the most appropriate COVID-19 testing codes, testing sites and type of test to use can be confusing. The guidance below can make it easier for you to refer your patients to high-quality, lower-cost COVID-19 testing sites, find Summit Community Care-contracted laboratories and identify the proper CPT® codes to use. Contact your Summit Community Care representative for additional information or visit <https://provider.summitcommunitycare.com>.

### Refer patients to [www.summitcommunitycare.com](http://www.summitcommunitycare.com) to find convenient testing locations

If an Summit Community Care member requests a COVID-19 test, you may refer them to Summit Community Care to find a testing location near them. Our test-site finder gives members important information about each site, including days and hours of operation, and if they offer:

- Appointment or walk-in
- Drive through service
- Rapid test results
- Antibody testing
- Testing for children

### Consider Antigen testing as an option when rapid results are needed

Antigen tests can be a quicker way to detect COVID-19 than nucleic acid amplification tests (NAAT), (for example, PCR). Antigen tests offer a reasonable and lower cost alternative when screening asymptomatic or low-risk patients and may be most useful for individuals within the first five to seven days of symptoms when virus replication is at its highest.

### Send swab tests to Summit Community Care-contracted laboratories

When providing COVID-19 molecular testing services to our members, consider utilizing the following additional in-network, high-quality labs to assist in helping to ensure that our members are receiving high-value healthcare.
